

CASE STUDY

SSE FRAMEWORK AGREEMENT LV CABLE INSTALLATION

McGowan have undertaken a number of projects involving new undergrounding of LV cable through existing bitmac footpaths and pavements as part of the current SSE Framework Agreement 'Excavation, Cable Laying, and Reinstatement (up to and including 33Kv) Scotland'

Works were undertaken in accordance with current SSE cable installation guidelines and work specifications, with comprehensive pedestrian and vehicle management arrangements maintained within these residential areas in accordance with local authority Roads Planning requirements.

Additional measures were adopted on site to prevent the potential spread of Covid-19, most notably being measures to ensure social distancing were maintained on site during the works in order to protect own staff, official site visitors, and the general public.

PROJECT TYPE: UTILITY WORKS – LV CABLE INSTALLATION

LOCATION: VARIOUS

CLIENT: SCOTTISH SOUTHERN ELECTRICAL (SSE)
